Also, the following report:

INDIANAPOLIS, January 3, 1876.

To the Mayor and Common Council of the City of Indianapolis:

Gentlemen :— We submit the following report of the City Dispensary for the year ending December 31st, 1875 :

Owing to certain stipulations in the agreement by which the Bobbs' fund was donated for dispensary purposes, which designated certain persons to be physicians and druggists of the Dispensary, also fixing the limit for payment of the same at such small sum that the needs of the poor of our city could by no means get the full benefit of your donation. For that purpose it was deemed best to leave the Bobbs' Free Dispensary and create a City Dispensary not connected with any medical faction, or hampered by regulations which would limit its usefulness.

By experience of several years, it was found less expensive to have a dispensary room in a central part of the city; to have a well qualified druggist who shall prepare all medicines and compound all physicians prescriptions; to purchase medicines at wholesale, and pay physicians a reasonable sum for their visiting, a work that requires a large portion of their time by day and night.

Upon this plan, the City Dispensary, at No. 30 South Delaware street, has been in operation with the following results :

Visits to poor at their homes.....	5,563
Patients prescribed for at Dispensary.....	4,210
Whole number of prescriptions filled.....	10,322
Persons vaccinated.....	7,070
Surgical cases treated.....	49

The past season has been one which produced an unusual amount of sickness, and at the same time an unusual lack of work for the poorer classes, and the Dispensary has been called upon for more than four times the relief over any former year, although the expense has not been increased more than eight hundred dollars over the year 1873.

It is most difficult to make estimate for an institution of this kind, as we cannot predict the weather or the work for the coming year, nor the sickness that may be

caused by them. Providing nothing more urgent than the past year is to be encountered, the city should increase their donations to eight hundred dollars per quarter.

Respectfully submitted.

W. B. FLETCHER,
Superintendent Dispensary.

Which was referred to the Committee on Benevolencé and Hospitals.

By consent, Mr. Albershardt presented the following communication from the Water Works Company :

INDIANAPOLIS, January 3, 1876.

Messrs. Albershardt, Duffley and Hook, Committee on Water Works:

Gentlemen:—I present herewith several papers in relation to the action of the Water Works Company, in complying with the contract with the City Council, that you will please lay before the Council at their meeting on Monday, January 3, 1876.

The first is a copy of the resolutions by the Council, adopted at a regular meeting on June 15, 1874, and printed in the Council proceedings on pages 285 and 286. I send you a copy of these resolutions, for the reason that you may not be able to find an extra printed copy in the office of the City Clerk.

The second is a list of water pipe laid by the company in compliance with the resolution. The list shows the size of pipe laid, its location, and measurement in feet. The measurements were made at the time the pipe was laid by Jos. H. Dennis, the engineer of this company, and I have no doubt of their correctness. The list shows the pipe located by the Council, as well as that located by the company. In some Wards, changes were made in some of the lines after they were reported to the Council by the Committee on Water Works, and Fire Department. These changes were made by the Councilmen of the Ward, and agreed to by this company, under authority of resolutions of the Council, adopted at the time the list was presented and accepted by the Council, in November, 1874.

You will see that we have laid 111,591 feet of water pipe, or 21 miles and 711 feet. On nine squares, old pipe was taken up and replaced with larger pipe, which reduces the amount of new lines laid, 4,842 feet, leaving the amount of new and additional water pipe laid, 106,749 feet, or 20 miles and 1,149 feet. In laying new pipe on the squares in which old lines had been laid, we left the fire plugs on the old line in, and put in other fire plugs connected with the new lines beside them, so that no square was without fire protection while the change was being made. This plan increased the cost to the company, but we felt it due to the Council, and the

public, that no part of the city should be without fire protection while making the change.

The third is a list of fire plugs, located and put in under the direction of the Council. This list gives the number and location of all plugs put in under the resolution, and all additional to those previously in. You will see that but 324 plugs have been located, out of 365 agreed on, leaving 41 yet to be put in. This company has repeatedly and persistently urged the Chief Fire Engineer (who was charged with the duty of locating the fire plugs) to locate them, so that they could be put in as the lines were being laid, and if the locations had been made, the plugs which we bought and have on hand, would have been set, and the city would have had the benefit of protection from them. This company is now ready to put those 41 fire plugs in, at such places on the line of our pipes as the Council may direct, as they have during the late summer and fall seasons, when they could have been put in with less permanent injury to the streets.

The new machinery erected by the company, so far exceeds in size and capacity, what was contemplated at the time the agreement was made with the city, that we do not believe one member of the Council will doubt for a moment that the increased power and capacity of said water works are of such character as to fully comply with their charter or contract with the city.

As fast as new lines of pipe were laid, and the water turned on, the Chief Fire Engineer was notified of the fact, and the new fire plugs thus brought into use have been included in the bills presented to the Council, up to the full number now in, 324. We respectfully claim, that having faithfully fulfilled our part of the agreement, we are entitled to pay for the 365 fire plugs named in the resolution from this date. This company stands ready to put in 41 fire plugs, not yet located, on the lines of pipe now in, whenever and wherever the Council may direct.

Allow me, gentlemen, to congratulate you on having provided this city with most efficient and effective protection from fire. If there is a city in the country that is better provided in this respect, I do not know where it is.

All of which is respectfully submitted.

JOHN R. ELDER,

President Water Works Co.

COPY OF RESOLUTIONS ADOPTED JUNE 15, 1874.

Whereas, A proposition was presented to the Council on the 9th of March last, from the Water Works Company of Indianapolis, to increase the machinery at their works and lay twenty miles of additional water pipe; which proposition was referred to a committee that agreed on a report, but have not presented it to the Council;

And whereas, It is evident to this Council, and to the public, that to secure the proper protection of the property in the city from fire, the power of the works

should be increased, and water pipes should be extended and laid down in those parts of the city that now have but small protection of fire ;

And whereas, It is evident, that if the city is to get the benefit of the extension of pipes and increase of machinery this year, prompt action of the Council is necessary, so that the company can at once make the necessary arrangements ; therefore, be it

Resolved, By the Common Council of the City of Indianapolis, first, that in consideration that said Water Works Company of Indianapolis, will add to the power and capacity of their works as proposed, and will lay down and maintain twenty miles of additional water pipe ; ten miles to be laid down on such streets as the company may select, and ten miles to be laid on such streets as may be designated by the Common Council ; the whole to be completed by the end of the year, 1875, and put thereon and connect, at their own cost, at such points as may be designated by the Common Council, and shall attach and connect, at their own cost, at such points on the lines of pipe now laid by the company, or such other lines of pipe as may be laid, under the provisions of this resolution, as shall be designated by the Common Council, three hundred and sixty-five additional fire plugs to those now in use ; the city of Indianapolis hereby agrees and obligates itself to accept said three hundred and sixty-five additional fire plugs, and pay said company, as rent for the use of each of said fire plugs, for fire purposes, the sum of fifty dollars per annum, payable quarterly, under the same rules and on same conditions as is provided in the original ordinance ; *Provided*, that the increased power and capacity of said Water Works, be of such character as to fully comply with their charter, or contract with the city, but such power and capacity shall not be judged only in certain localities, but in every part of the city where the pipes may be laid.

Which was referred to the Committee on Water Works, Committee on Fire Department, City Civil Engineer and Chief Fire Engineer.

Mr Kahn, from the Committee on Contracts, submitted the following report :

INDIANAPOLIS, January 3, 1876.

To the Mayor and Common Council of the City of Indianapolis :

Gentlemen—Your Committee on Contracts to whom was referred the communication of Mr. Bernard Hammill, in reference to his bid for the covering with cinders the Kentucky avenue sewer, would report that the bid is much lower than the work can be done for, and would recommend that said Bernard Hammill be allowed to withdraw the same. We would further recommend that the work be readvertized.

Respectfully submitted,

LEON KAHN,

ROBT. C. MCGILL,

Committee on Contracts.

BERNHARD H. DIETZ,

City Civil Engineer.

Which was concurred in.
