SELECT COMMITTEE REPORTS

August 18, 1969

To: Indianapolis City Council

From: Harold J. Egenes, Chairman, Special Council Committee to Investigate Brendonshire Area Drainage

Gentlemen:

On Saturday, August 9, 1969, the Special Committee made a field investigation of the area bounded on the North by East 56th Street, on the East by Daniel Drive, on the South by Moon Creek, and on the West by Arlington Avenue.

The Special Committee was assisted by various residents of the neighborhood who related their experiences during recent heavy rains and especially the problems of sanitary sewer backup in basements on July 22nd, 1969. Representatives of the Indianapolis Sanitary District indicated that the removal of an inspection plate located in the 5200 block of Hawthorne Drive during the period of the heavy rain, caused an accumulation of 10 inches of water on the street surface. It is not known who, or which department removed the inspection plate. In any event, this surface water allowed to drain into the sanitary system, caused a backup of sewage in basements.

In the opinion of some members of the Special Committee, the surface water problem has developed as a result of land developers making inadequate provisions for surface drainage at the time of the development.

The Special Committee recommends that the County Surveyor make a field survey of the existing open ditch and drainage, in order to determine if the existing system has the capacity to handle the surface water, if the existing system is cleaned of vegetation and debris. It was evident that some of the residents of this neighborhood contribute to the problem by discarding grass clippings and trash in the ditch, which causes culverts and small bridge structures to become clogged. Both the residents and agencies of City and County Government have at times removed debris from these structures.

The Special Committee also recommends that any construction plans for Arlington Avenue and East 56th Street include the provision for street drainage with the possible tie-in of this drainage with that of the Brendonshire-Brendon Park area.

In Summary:

1. Have the County Surveyor measure the fall of the waterways affecting surface drainage.

2. Insist that plans for construction of East 56th Street and North Arlington Avenue include provisions for surface drainage and possible tie-ins.

3. Consider the possibility of an assessment of benefits for drainage work for property in the watershed area contributing to the problem.

4. Admonish residents to comply with the laws pertaining to disposal of grass clippings and debris in the course of the waterways.

Respectfully submitted,

HAROLD J. EGENES  
Councilman

President Hasbrook called for the Introduction of New Ordinances.
