Cover photo: The photo was taken during the archeological study of a pioneer period house site (ca. AD 1835) known as the Reddick Site. Under the "St. Mary's Treaty" signed in 1818, native Americans surrendered the land in the central region of the new state of Indiana to European-American settlers. This site passed through several land owners and in 1903 was purchased by the United States government for use as Fort Benjamin Harrison. This area became the Fort Harrison State Park in Marion County, Indiana in 1995. The scene is the 100% surface collection of artifacts, and the orange flags mark the 1-meter units. This work was done by the Next Step Education Through Archaeology project administered by Martin University. In 2006 it was shown that the areas that were surface collected had not been plow disturbed, and may represent a natural deposit since the Pleistocene.
